**6 Institutional set-up for Liquidity Risk Management**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions in a timely manner, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company is governed by the Liquidity Risk Management framework as defined in the Asset Liability Management (ALM) policy of the Company. The Asset Liability Committee (ALCO) is responsible for implementing the liquidity risk management strategy of the Company and ensures compliance of the same with the overall risk management strategies of the Company

**\* Definition of terms as used in the table above:**
